## WORK EXPERIENCE

### Senior Associate Consultant

Infosys limited | Client - British Telecom

12/2021 - Present

Pune

#### Achievements/Tasks

- Worked with the ECM Team for British Telecom, developing an infrastructure management system that included building a distribution board with 2D visualization using JavaScript, enhancing infrastructure monitoring and management capabilities using javascript framework like **Reactjs**.
- Created 2D visualizations for server components and their placements to optimize space management and availability.
- Collaborated with cross-functional teams to ensure seamless project execution. Owned the entire process from building to deployment, ensuring high-quality deliverables and efficient release cycles.
- Participated in code reviews and documented RBAC routing development to manage role-based login systems.

### Fullstack Software Developer

Decipherzone Software

11/2020 - 11/2021

Jaipur

#### Achievements/Tasks

- Developed and maintain the user interface for transaction management systems using **ReactJs**, ensuring an intuitive and user-friendly experience. Develop interfaces for users to view and analyze their transaction history and generate reports.
- Ensure the accuracy and reliability of transaction data displayed to users, implementing validation checks to prevent errors

### Member of Technical Staff

Mountblue Technologies | Client - Vymo Solution [1 Yr 3 Months MBT After That Worked For Vymo]

12/2018 - 09/2020

Bangalore

#### Achievements/Tasks

- Contributed to the Service Delivery and Onboarding teams, building and maintaining custom sales workflows for clients to enhance efficiency and user experience.
- Developed and implemented custom report generation features, enabling detailed analysis and tracking of sales engagements using **Angular**.
- Integrated third-party collaboration platform Slack to consolidate and deliver comprehensive sales reports, improving team communication and decision-making.
- Diagnosed and resolved critical production bugs, significantly enhancing system stability and performance.

### System Engineer

Travelyaari

02/2017 - 04/2018

Bangalore

#### Achievements/Tasks

- Focusing primarily on database administration, where responsibilities included monitoring key metrics and setting up performance benchmarks to ensure optimal database functionality.
- Simultaneously undertook the role of a frontend engineer where I worked on the building the generic library for displaying the chart on the agent portal.
